“A is for Art” has become a major event in the life of the SDSU Children’s Center. Words can not convey the joy in the children’s faces when they see “their painting” on display in a real art gallery. Each year they look forward to the time spend work with the visiting artists and their teachers, as they create a “masterpiece.” With your help we can make the upcoming “A is for Art” events even more meaningful to the children and their families.

Creative art expression is a highly valued integral part of our daily curriculum. Art is a language in and of itself, providing children a vehicle for exploration, choice and individual thinking. To a confident artist, the wide world is open to limitless possibilities for growth and learning.
