Ergonomic Tips

Keyboard
- Keyboard is adjusted so arms and forearms are at a 90 degree angle and hands form a straight line
- Keyboard is positioned flat or at a slightly downward slope
- Arm positioning is parallel to the floor
- Mouse is located directly near the keyboard (accessible with minimal reach)

Monitor
- Monitor is situated at or lower than eye level
- Viewing distance is approximately arm length
- Monitor is positioned to avoid glare

Chair
- Seat is adjusted so feet are flat on the floor (use foot rest if necessary)
- Seat is adjusted so that it supports the lower back

General Tips
- Telephone and other consistently used equipment is within minimal reach
- Posture is upright or slightly reclined
- Long periods of continuous computer use is broken up to perform other tasks
